BOARD POLICY

Policy No. 2401

Page 1 of 1

FINANCIAL EDUCATION MASTERY-BASED LEARNING AND CREDIT

The board recognizes the value of helping students understand the importance of financial education. Financial education includes knowledge and skills related to spending and saving, managing credit and debt, using a career plan to understand income potential, setting and working toward personal financial goals, and applying decision making to matters of personal finance. When students develop their financial education, they are better prepared for successful post-secondary pathways and careers. The district encourages students and their families to take advantage of any financial education learning opportunities available to them through independent activities and programs.

The district will encourage students to learn financial education effectively at a high level of proficiency. The district also recognizes the importance of allowing students to learn at their own pace, and the educational benefits that can be gained by giving students the opportunity to demonstrate competency of skills, proficiency of standards, and mastery of concepts.

As described in the procedures, the district will award financial education credits to students based on demonstrated mastery/proficiency across a range of financial education skills.
