♦ It is believed the star fruit originated in either Sri Lanka or Moluccas (islands of Indonesia)

♦ It is commonly grown in Southern China, India, and the Philippines. To meet the increasing popularity the fruit is now grown in Florida, Hawaii, and Puerto Rico.

♦ The fruit is harvested when the green fruit has a hint of yellow.

♦ When the fruit is cut crosswise it forms a perfect star.

♦ Packed full of nutrients like protein, vitamin C, fiber, potassium, and copper.

♦ Star fruit has a natural sweet sour taste.

♦ This fruit grows on a tree.
