

## Symposium 2004 first step to new vision

Superintendent **Rich Carter** thanked the group of nearly 100 community members, students, staff and parents which met last month on the campus of Whitman College for *Symposium 2004* to discuss the future of Walla Walla Public Schools during a report to school board members last night.

"This Strategic visioning event was successful in large part due to their involvement," Carter said. "It was inspiring for me to witness stakeholders, policy makers, and school leaders working toward a common goal of establishing a hopeful and ambitious vision of the future for Walla Walla children."

This intensive, two-day Symposium was the first step in a long process to

take the school district to new heights of achievement and success.

The focus will now shift to getting outcomes from the Symposium communicated to even more Walla Walla citizens and staff.

"I am confident we will stand and deliver on a sound plan for the future that our Board of Directors will be proud to adopt and call its own," Carter said after reflecting on the Symposium process.

October 5 • School Board Meeting Recap

### ***Symposium 2004 - Next Steps***

- Get more community, staff input
- Establish Core Leadership team to help design a new Strategic Plan
- School board, upon direct input and involvement, approves new plan
- Implementation of new strategic plan
- Develop action steps necessary to make new Strategic Plan uniquely suit Walla Walla's needs
- Set aggressive benchmarks
- Monitor progress over time

**Complete results from *Symposium 2004* will be posted on the district website later this week.**

## **Wa-Hi students chart Blue Print for Tomorrow**

When students enter Walla Walla High School they embark on a journey mapped out by their *Blueprint for Tomorrow* project, explained Wa-Hi Assistant Principal **Mira Gobel** during a report to school board members last night.

"This project is a graduation requirement for Wa-Hi students that is designed to help them obtain the most from their high school experience," said Gobel, who is charged with leading and organizing this schoolwide project.

The *Blue Print for Tomorrow* allows students to achieve the Walla Walla High School exit outcome requirements and meets Washington State's Accountability mandates.

### *Blue Print for Tomorrow Tasks*

## New reading program improves skills

The district is on track to have 85 to 90 percent of students reading at grade level within three years, according to a report to school board members last night by Title One Coordinator **Judy Peasley** on the district's new *Literacy First* Reading Program

Peasley said the program relies heavily on teacher training and support from administration to stress the importance of building reading skills. The district is focusing its *Literacy First* efforts at secondary grade levels.

Teachers involved in the program will learn improved instructional strategies, how to better help struggling readers, and techniques for getting parents more involved with reading at home.

*Literacy First is a comprehensive, research-based three-year change process designed to ensure 85-90 percent of students are reading on grade level by the end of three years.*
