

# HOW TO PLANT SEEDS POSTER AND PLANT JOURNAL

By Michaela Peterson

Clipart by [www.scrappindoodles.com](http://www.scrappindoodles.com)

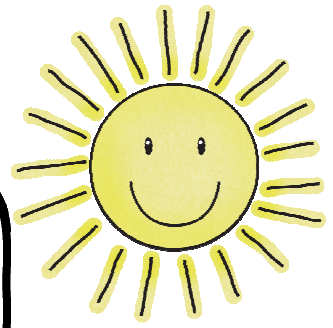

\*This Planting “How to” can be set up in a planting area with a bag of soil, seeds (we use corn, bean, pumpkin), clear plastic cups, tape, markers, and water.

\*Students can rotate to the center to follow the directions independently to plant their seeds. As a class you can make predictions as to which seed you think will sprout first.

\* (To prepare journals simply stack all journal papers and cut down the center. Then staple booklets together.) Students will draw what their seed looks like on the first page of their journals. When the first plant sprouts, have everyone date their page and draw pictures of their plants. Record every few days. Send plants home after 3 or 4 entries.

# How to Plant Seeds

1. Put dirt in a cup.

2. Put three seeds in the cup.

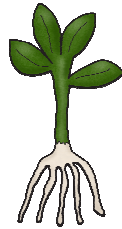

3. Cover with about 1/2 inch of dirt.

4. Dampen with water.
